EXTRA ENCLOSURE
FOR YOUR INTEREST.

According to Ouspensky the second fundamental law of the universe is the Law of Seven or the Law of Octaves. To understand this law, "it is necessary to regard the universe as consisting of vibrations." Vibrations are continuous and proceed in an ascending or descending rate - "so long as there continues to act the FORCE OF THE ORIGINAL IMPULSE which caused the vibration - and which overcomes the continual resistance."

"When the resistance gains the upper hand the vibrations naturally die down and stop." (If the 'pressures' - denying forces - becomes too great, one quits). Everything we are involved in is under this law.

* If the RIGHT SHOCKS are not given at the interval points the octave will change direction (deviate).

The INNER OCTAVES of the FELLOWSHIP...

This is only one example - the LENGTH of an octave is determined by the length of the BEGINNING NOTE (DO).

IN THIS EXAMPLE, THE NOTE 'DO' IS FIGURED AT 18 MONTHS.

- ① 18 - 36 months
- ② 36 - 72 months
- ③ 72 - 144 months

... EACH OCTAVE IS TWICE AS LONG AS THE OCTAVE PRECEDING IT (if it is a descending octave it would be HALF as long).

The LIFETIME of the Fellowship would be one COMPLETE OCTAVE - ... but it would contain many "inner octaves" (between each note is a whole octave - and that octave is similarly divided):

do re mi fa sol la si do

do re mi fa sol la si do

PRINCIPLES:

- (1) Octaves MUST rise or descend in EVERY CASE.
- (2) There are PERIODIC fluctuations (CYCLES), that is, a rising and falling, in EVERY LINE, whether ascending or descending.
